

SAPO 019 - ENVIRONMENTAL POLICY

- Our facility is committed to comply with the National and local legislations on environment. We shall ensure that our facility shall be maintained on such a way environment will not be affected in any ways. We will strive to achieve our commitment to environmental compliance through following measures:
- We will try to minimize all forms of waste as much as possible.
 - We will try to minimize all forms of pollution as much as possible.
 - We will use environmental friendly equipments and tools.

We will collect all wastes based on the nature of waste such as fabric waste, plastic waste, electrical waste, glass waste, metal waste, sanitary waste, waste water etc., and dispose them in an environmentally safe manner and in compliance with pollution control board norms. We will try as much as possible to dispose of the wastes in a recycling manner.

- We will obtain consent orders for air emission and water discharge from the pollution control board. We will conduct Air Quality, Noise Level test, Stack Monitoring Test reports periodically to ensure that we are in compliance with pollution control board norms. We will strive to plant more trees in our environment. We will display awareness posters in our facility to make employees aware of the importance of greener environment.

Individual coordinators are appointed for complying with this policy.
