

TINNA RUBBER & INFRASTRUCTURE LTD.

QUALITY POLICY

At TINNA, We wish to become the preferred supplier for our customers by producing Quality products and consistently delivering customer satisfaction by providing on time delivery at a competitive price.

We commit to continuously innovate our products & processes through automotive process approach, Risk based thinking, deploy new technologies, new Ideas (KAIZEN) and Continual Improvements.

We aim to facilitate 3R concept (reduce, recycle, and reuse) waste material in entire supply chain management through ESG implementation.

Achieving top Quality is central to all our actions and we aim to be a zero-defect producer while maintaining optimal efficiency in process and production

As a good corporate citizen, we take full responsibility of our product, well-being of our employees and environment and commit to adhere to all applicable Legal requirements.

Director & COO
