Sub: Disclosure of Material Events - Commencement of New line of Operation in Existing Plant- Panipat

Dear Sir/Ma'am,

We are delighted to inform you that, in accordance with Regulation 30 of SEBI (Listing Obligations and Disclosure Requirements) Regulations, 2015, our esteemed company is embarking on an exciting new venture. We are pleased to announce the introduction of a new plant at our existing Panipat facility dedicated for the production of Thermo Plastic Elastomer (TPE).

In light of the prevailing issue of plastic pollution that our nation faces, Tinna Rubber and Infrastructure Limited has perceived this challenge as an opportunity for innovation. With a deep-rooted commitment to sustainable practices, we have taken the bold step of establishing our first plant to manufacture Composite Polymer. This innovative facility will employ waste plastic and waste rubber as raw materials, transforming them into valuable resources.

The plant's impressive capacity allows for the processing of an estimated 6,000 tons annually. Approximately 60% of this volume will comprise various plastic wastes while the remaining 40% will consist of Crumb Rubber derived from discarded tires. By utilizing these materials, we will actively contribute to the reduction of environmental harm caused by plastic and rubber waste. This new plant represents a substantial leap towards achieving our sustainability goals in manufacturing specialized materials moving up to value chain.

We expect to commission the plant by end of Quarter four of this Financial Year.

This is for your information and record please.

**Thanking you
For Tinna Rubber and Infrastructure Limited**

**Vaibhav Pandey
(Company Secretary)**
